R.A.C.E. STATION™

Go beyond basic fire extinguisher training

HELPS REINFORCE THE FIRE PROCEDURE TO BUILD ON-THE-SCENE FIRE RESPONSIVENESS.

The LION R.A.C.E. Station™ recreates the stressful environment of an actual emergency. Trainees see simulated flames and the strobe light flash, hear the horn and fire sounds, and see the training smoke. Upon discovery of a simulated fire, trainees may use the R.A.C.E. Station™ to practice the fire procedure by alerting with the Emergency Phone and/or call point before attempting to extinguish the fire.

PUT R.A.C.E. TO THE TEST

When faced with a number of decisions to make before the fire grows out of control, fire extinguish training helps them respond quickly and accurately. Arm your community with the skills to tackle incipient stage fire emergencies, saving lives, property, and fire department resource.

A SEAMLESS TRAINING EXPERIENCE

The R.A.C.E. Station™ communicates wirelessly with the BullsEye™ - Digital Fire Extinguisher Training System for a seamless training experience. Customise training scenarios to each location that you train in and their specific response plan. The R.A.C.E. Station™ can also be used with other LION training tools or as a standalone unit.

TAKE YOUR TRAINING ANYWHERE

The R.A.C.E. Station™'s collapsible design makes it easy to pop together and start training. Each prop is lightweight enough for one person to set up and dismantle. Train when it's convenient for you. Train where emergencies may really occur - the break room, shop floor, or your local school.

Place each respective prop near the actual emergency equipment in your facility because distance isn't an issue. Each prop uses Bluetooth 5 technology to create a mesh network that enables communication between props up to 150 metres in distance. With Bluetooth 5 mesh network, you can even daisy chain props together for greater distances.

R.A.C.E. STATION™

Specifications

PHYSICAL SPECIFICATIONS

Tripod Base Dimension: 91.5
cm (36") Dia Max Spread

Tripod Height Adjustment:
114-193. cm (45"-76")

Tripod Weight: 2 kg (5 lbs.)

Prop Box Weight:
2.5–3 kg (6-6.5 lbs.)

**Standalone Prop Case
Dimensions:** 114.5 cm x 41 cm
x 33 cm (45.1" x 16.0" x 13.0")

Standalone Prop Case Weight:
14 kg (31 lbs.)

**Standalone Prop Case
Transport Features:** Pull
handles with corner wheels

Input Power: 5VDC, 750mA

Battery Life: 8 hr minimum at
full charge (battery life varies by
prop)

Strobe Brightness: 15/75cd

Horn Volume: 89-96 dBA at

92 cm (3 ft.)

Residential Alarm Volume:
83 dBA at 92 cm (3ft.)

FEATURES

Emergency Phone Number
customisation included

Emergency Phone Response
Message customisation included

American style alarm call
point and electrical cut off
switch also available

ELECTRIC CUT-OFF
TRAINING PROP

Use the Electric Cut-Off prop
along with the BullsEye™ to
teach trainees to recognise
the characteristic sounds of
an electrical fire and react
appropriately. After pulling the
cut-off or turning switch-off, the
electrical fire arcing sounds will
cease, indicating that it is now
safe to extinguish

Interactive Emergency Smartphone   **Strobe Light & Annunciator**   **Call Point**
